

Brake pedal enlargement

This brake pedal enlargement is nicely machined aluminium, knurled and silver anodized. The knurled surface provides much better grip than the original brake pedal. It has a slot on its lower side which you tighten with a calliper and it will stay perfect in place. You can also secure the brake pedal extension using some silicone.

Length: circa 5,5cm, Diameter: circa 2,4cm

Also referred to as brake pedal enlarger, brake pedal extension, foot brake lever width extension. Suitable for: R 1150 R R 850 R since 03 model R 1100 S R 1150 RS R 1200 ST
