

Crashbars

Our crashbars are made of high-quality steel and are specially designed for your F650GS, F700GS and F800GS 2008 model or newer. The crashbars are designed to be very robust and allow an equal distribution of the forces so that you and your bike are protected in the best possible way. Crashbars offer a very good protection but they can reduce the cornering angle.

Well suited for drivers with long legs.

Also referred to as engine bars, highway bars.
