

Spoiler for windshields

The MRA X-creen spoiler can be set according to your individual needs in order to eliminate turbulence, wind pressure or annoying noises.

The spoiler can be adjusted with two independently adjustable pivot points.

The spoiler is 36 cm wide and 16.3 cm high and available in clear or smoke gray with EU homologation for the original windshield and all MRA windshields!

The spoiler can either be screwed or clamped with an extra bracket.

Screwed: The X-creen-spoiler is fixed via four screws. The existing screen must be drilled for this purpose.

Clamped: The X-creen-spoiler is clamped onto the existing screen with a special holder (picture 3). This mounting needs no drilling or gluing. The bracket is not part of the standard product range of the X-creen and must be purchased separately.

The distance between the two black mountings which will be screwed to your screen is 25 cm. If you use the clamps, your windshield needs to be at least 28 cm wide on the top.
