

Crash Protector Plus

These crash protectors are the latest design-version of the EQ704 crash protectors. They offer the best possible protection if a crash was not avoidable. The brand new compound plastic can absorb forces of a crash without braking. But these crash protectors are not only very usable but also good looking. The crash protectors are for left and right side and you can mount them quite fast and easy. They come with a special holder so no drilling or cutting the fairing is necessary.
