

Motorcycle-Battery-Jumper-Cable

It is pretty difficult to use the big battery jumper cables for cars with a small motorcycle battery. This smaller battery jumper cable which is especially made for motorcycles does this job much better. The pincers are fully insulated and you can use them on small batteries (motorcycles) as well as on big batteries (cars).

Length 1,5 m

Big wire cross section: 6 smm

Small pack size: ca. 24 x 11 x 5 cm

Art-Nr.: BA06

18,50 EUR

Motorcycle Battery Jumper Cable
