

Lifter - Assembly Stand

Article number 2016N: Slide the rubber coated pipe of the Back lifter in the final drive of your BMW and lift it up. Easy to use by one person and very stable support for the bike. Made of high quality steel. Diameter 42mm, zinc-plated. The diameter of the rubber is 52,5mm.

The long and bent lever makes sure that you can hold the handle bar while lifting the motorcycle! You can move the complete motorcycle very easy and fast when you combine our lifter with the Shunting-Set article number 2017RS.

Article number 2017RSI: Shunting-Set (only front)
