

Universal mount for GPS and GPS bag

Universal mount made of CNC milled and anodized aluminium, fits for the GPS bags S951, S952, S953 and S954. The mount allows the installation of the GPS bags on the triple clamp of the motorcycle and can be turned and leaned in all directions in order to achieve the ideal position for the GPS. The universal mount fits for many different motorcycle models.

Shipment for part no. S901A includes the universal mount with fixation screws 2x M8x50 / 2x M8x55 and 2x distance.

If the universal mount is combined with a specific holder (part no. SGZ39SM), the GPS systems Garmin Zumo 340-395LM / 590-595LM (and all Garmin Zumo GPS systems with this hole pattern, like also Zumo 550, Zumo 660 etc.) can also be mounted. In order to mount TomTom GPS devices, an additional adapter (part no. tom-Ad Ed 2) is necessary.

Installation Instruction Universal Mount
