

Angular USB adapter for motorcycle socket

Our USB adapter for the motorcycle socket (USB10) adapts different 12/24V sockets to the USB standard of 5V to two USB sockets (USB-A and USB-C with max. 3,6A each). Usual USB adapters only fit for big cigarette lighter sockets. This USB adapter fits for both the big cigarette lighter socket and the smaller motorcycle socket like BMW uses it (DIN socket, article number 90025).

- Universal USB adapter
- Ideal right angle form
- With splash cover
- 3,6A USB-A and USB-C output

IMPORTANT: Please take the adapter out of the socket, when you stop riding the bike - otherwise your battery can discharge! Or use a proper battery charger when you don't ride for a longer time (>14 days).

Also referred to as USB adapter, USB plug-n-play socket, plug & play USB power outlet.

Art-Nr.: USB10
