

## Rear mounting stand

This assembly stand for the rear of your BMW R18, R18 Classic, R18 Bagger, R18 Transcontinental & R18 100 Years is perfect for care, overwinter and servicing.

[Install Instruction 1](#)

[Install Instruction 2](#)

In the beginning, it is essential that you carry out the work steps with a second person for security!

Only fits with the original exhaust system.

An adapter for models with accessory exhaust systems is in preparation.

If a Remus exhaust is fitted, the jacking lever must be shortened by 30mm.

Be careful not to scratch the exhaust!

By means of the maneuvering set X518ER1, which includes 2 pieces and is sold separately, you can shunt your motorcycle.

This work stand only lifts the rear of your motorcycle! If you also want to lift and maneuver the front section, please use article X518 and possibly X518R2!
