

Handlebar Risers with Offset

Handlebar risers with offset: 30mm higher and 25mm closer to the rider

Raising the handlebar by 30mm results in a more upright, much more relaxed seating position. Moreover, the handlebar is brought 25mm closer to the rider which additionally improves driving comfort. The overall result is a noticeable increase in stamina and concentration.

The length of the brake line is a bit too short for this conversion. We recommend to use our adapter 27819, which is sold separately.

With EU street homologation!

Also referred to as handlebar risers, handlebar height increase, bar back risers, barbacks.

BMW S1000R (2017-2020)
