

Waterproof side bags CANYON

Waterproof side bags CANYON (pair), each with a volume of 25 litres

These side bags feature a waterproof roll-top closure system and adjustable top and bottom straps with clip closures to ensure tension tightness. The front flap of the side bags is equipped with a sturdy PVC mesh pocket on the back for additional storage space. The 8 load compression points, the side eyelets for liquid drainage, a removable inner reinforcement and the ergonomic handle make the side bags reliable companions on all motorcycle trips. Additional luggage, such as item GRT722, can be attached to the 8 side loops if required. The fluorescent yellow waterproof high-frequency inner bag with adhesive tape defies heavy rain and extreme conditions (IPX5 waterproof quality), so that the contents of the side bags always arrive dry at their destination. The reflective motif prints on the side bags ensure better visibility of the motorcycle in bad weather.

Dimensions: 40 x 40 x 21 cm

Maximum load per bag: 5kg

Materials:

- High tenacity 1200D W/R polyester and thermoformed PE back
- 1680D/ high tenacity PU coating
- Hypalon
- Exterior materials with high UV resistance

In order to mount the side bags you need the correct mounting system (see part no. PL5126).

Attention: These are soft bags. Therefore, after assembly and loading, please ensure that the side bags do not touch the motorcycle's exhaust system and are not hit by the escaping gases.
