

Waterproof tail bag CANYON

Waterproof tail bag CANYON (1 piece), volume of 40 litres

This tail bag features a double access with roll-top closure system and has straps with velcro fasteners at the ends and cam buckles to ensure tension tightness. The rear part of the upper flap of the tail bag is equipped with a sturdy PVC mesh pocket for additional storage space. The 4 load compression points, the M.O.L.L.E. system underneath the upper flap and the ergonomic handle make the rear bag a reliable companion on all motorcycle trips. The fluorescent yellow waterproof inner bag defies heavy rain and extreme conditions (IPX5 waterproof quality), so that the contents of the rear bag always arrive dry at their destination. The reflective motif prints ensure better visibility of the motorcycle in bad weather.

Dimensions: 55 x 20 x 40 cm

Maximum load: 5kg

- High-tenacity 1200D W/R polyester
- Thermoformed PE base
