

H7 bulb main headlights RacingVision

This powerful street-legal headlight bulb delivers up to 200% brighter light (compared to the minimum legal requirement) for a safer and more enjoyable driving experience. The Philips RacingVision GT200 moto light bulb has a high-performance light beam that shines further than traditional bulbs. The optimized lamp design enables higher luminosity, so the driver can benefit from better visibility, faster reaction time and better control of the vehicle. Thanks to a unique coating process, the light throughput of the bulbs has been maximized so that the road is optimally illuminated even when driving at night, and the advanced quartz glass technology ensures greater resistance to temperature fluctuations to increase the lifetime of the lamp.

Scope of application: high beam & low beam

Socket: PX26d

Technology: Halogen

Lumens: 1500 ±10 %

Color Temperature: 3,500K

Wattage: 55W

Rated voltage: 12V

With ECE homologation!

Attention: Please do not touch the glass bulb with bare hands when installing it. This powerful Halogen bulb warms up stronger than conventional bulbs - skin fat and dirt impede the heat emission and can therefore damage the bulb. Always touch the bulb with a clean and fat-free towel when mounting it. For a longer lifespan of the bulbs on your vehicle you can use an electronic protector which prevents voltage peaks from damaging bike components.
