

Tubeless Tire Repair Kit

tyrerepairkit

Tire repair kit for repairing holes in tubeless tires for cars, trucks, motorcycles, scooters, caravans etc.

Only suitable for tubeless tires!

The set contains everything you need for a quick emergency repair of damage to the tire tread.

Note: Tire repair kits are only used for emergency tire repairs and a short journey at a correspondingly reduced speed to the nearest specialist workshop! Only suitable for damage to the tread! Do not use if there is damage to the side of the tire!

Scope of delivery of the tire repair kit:

- 1 rubberized plastic T-handle (no more slipping) for expanding the repair area
- 1 rubberized plastic T-handle (no more slipping) for pulling in the vulcanization strips
- 1 pliers for removing foreign objects from the tire
- 1 cutter knife
- 5 self-vulcanizing rubber strips
- 1 pair of cotton work gloves
- 1 storage bag

Scope of delivery of the refill pack:

- 25 self vulcanizing rubber strips

In order to fill the tyre with air again, a compressor or an air pump is necessary (part no. C74-Airman)!

Also referred to as tubeless tire plugger, tubeless puncture pilot.
