

Rear bag below the luggage rack

The BMW R1250GS still has a lot of unused storage space under the large luggage rack. This custom-fit three-piece tail bag can be attached here to create 2 liters of additional storage space for tools and other small items. The set consists of a central pocket and two side pockets, all of which are attached using Velcro straps. The bags also have reflective inserts.

Also referred to under tail rack cargo bag, storage bag for under rear luggage rack.
