

Smartphone support for OEM GPS bracket

22889
+
93054

This cradle fits perfectly into the original BMW navigation preparation and ensures that you always have a perfect view of your smartphone. The cradle is vibration-damped to protect your smartphone and allows you to attach the smartphone and charge the phone battery via the two integrated waterproof (IP66) charging sockets (1x USB-A and 1x USB-C). The smartphone can be positioned both horizontally and vertically on the cradle. The cradle is locked and unlocked using the motorcycle key, so that it is secured to the motorcycle in a way that prevents theft.

In addition to the cradle (item 22889), a compatible, universal cell phone holder (item 93054) or a compatible smartphone case (item 94361) is required!

Both items (22889 and 93054 / 22889 and 94361) must therefore be ordered.

Simply push in the quick release, turn it and attach or remove the smartphone holder together with the smartphone - easy and safe.

Attention:

No charging cable for smartphones is included in the scope of delivery!

Wireless charging is not possible!

The smartphone / cradle cannot be operated using the handwheel!

We offer an optional charging cable (type USB-C to USB-C). This allows smartphones that have a USB-C charging socket to be charged via the Quiklox Cradle. The charging cable supports quick charging, is 30 cm long and enables data transfer at 480Mbps (60MB/s), but does not support video output!
