

GIVI Trekker Outback EVO Smart cases black with cut-out for exhaust

OBKEV44BL

OBKEVS40BR

The Trekker Outback EVO Smart side cases are made of black painted aluminum and are each available in a right or left version and with a volume of 44/40 liters or 37/33 liters. The "Detachable Lid System" (system for opening the lid) is reinforced with stainless steel and allows the hinge to be locked and the lid to be completely removed. Using the side cases becomes even more comfortable thanks to the newly developed hook system ("Hold it Active System"), as the cases can now be tilted without having to completely disengage them from the side holder. This makes it easier to open the lid if a top case is installed.

Maximum load: 10kg

To make the rear symmetrical, the side cases must be combined as follows:

OBKEV44BL & OBKEVS40BR

OBKEV37BL & OBKEVS33BR

Note: The case must be completed with the cylinder SLR101. Alternatively, the SLR102, SLR103 or SLR105 cylinders can be used if you want to use the same key for several cases.

Note: A special motorcycle mount is required. See article PLOS5108CAM!

With the help of the article 11RKIT, the side case holder can be converted into a quick-release system (Rapid Fitting).
